

# Safety Management Services & Solutions

Keeping all-sized businesses Safe and Prepared

Health and safety compliance is a complex challenge for organisations of all sizes. The Health and Safety Executive (HSE) and other European regulators are continually updating existing legislation and bringing new regulations into force. Whether you are a large company with a complex project that requires sophisticated health and safety oversight, or a smaller business who needs to understand and apply health and safety yourself, 3Spires can help you.

When delivering our services, our consultants always promote an ethos and coaching mentality for self-education through open communication. Our style wins hearts and minds thus encouraging positive reporting cultures. By having a pro-active health and safety approach we trend safety observations and identify potential major incidents before they occur.

Based in the United Kingdom & Portugal, 3Spires Safety have provided health and safety services both off-shore and on-shore in the UK & Europe and are now expanding into the US. We offer comprehensive consultancy to various market sectors, including;

- Manufacturing
- Cable laying & mass flow excavation
- Wind Energy (Installation / O&M)
- Power Outages
- Offshore substation installation
- Marine sector

Our wide-ranging and international experience ensures our professionals will keep your workforce safe and prepared. One day we may be delivering a 'toolbox talk' to construction workers, the next we could be inputting statistical data into safety management systems for a large off-shore wind farm project. Either way, we provide services, on site HSE presence, incident investigation and documentation tailored for your industry.

3Spires offer platinum or premium health and safety services and solutions that work for all-sized businesses, whether you require a contracting, auditing, outsourcing or doing it yourself;

## **Platinum Contract: HSE Oversight Services for Medium/Large Businesses**

Aimed at companies that are delivering large projects that require a health and safety professional onsite for the duration of the project.

Our consultants that have spent prolonged periods at sea and worked in remote areas, delivering health and safety oversight for wind farm projects. We have provided wind power safety services consistently over the years and our professionals have developed key attention to detail when applying robust, safe systems of work throughout all phases of wind farm work scope. 3Spires have a wealth of onshore and offshore experience inclusive of floating technology.

When delivering health and safety oversight for construction projects, we ensure all processes are in place to reflect a positive HSE culture on-site. We can assist you in the selection of the right personnel to perform work-scope in line with HSE law, collation of construction phase plans, writing risk assessments, method statements, advice in selection of correct equipment and its supporting documentation, and the best forms of communication and advice in emergency response planning. <https://3spiressafety.com/wind-power-safety-services/>

No-matter what the project is our consultants understand all the elements of behavioural safety & its challenges. We repeatedly educate on-site workers and ask open questions, ensuring they continuously self-educate. We always ensure your workers are safe and prepared.

## **Platinum Auditor: HSE Independent Auditing Services for Small/Medium/Large Businesses**

Aimed at companies requiring an independent health and safety audit over your processes, individual projects/bids or reviewing permanently employed health and safety professionals.

Health and safety audits can be performed internally, but sometimes it just isn't enough and does not provide an appropriate level of impartial assurance. By contracting 3Spires to perform an audit, we will ensure your processes and professionals are meeting health and safety requirements based in line with industry best practice. We are also experts in delivering health & safety related tenders, ensuring you have prepared the necessary evidence to win work bids, or to register with a specific safety scheme.

### **Premier Onsite: Regular Onsite Services HSE for Small/Medium Businesses**

Aimed at companies that cannot justify the cost of a permanent HSE professional, for a monthly fee our Premier Onsite services provides an HSE expert who will visit onsite for 1-5 day(s) a month.

Our IOSH recognised consultants are highly qualified and will provide a full range of safety services at a regular interval. We will formulate all types of safety documentation, deliver performance assessments, incident investigations, emergency response plans and more to help your business stay legally compliant whilst maintaining the health and wellbeing of your workforce. We focus on behavioural safety and the need for concentration when working with heavy machinery and repetitive tasks.

Our consultants will assist you with collating the vital statistics needed to reflect a positive HSE culture. We can assist you in the selection of the right personnel to perform work-scope, the correct equipment and its supporting documentation, and the best forms of communication & advice in emergency response planning.

3 Spires Safety have robust templates that are aimed at individual industry sectors. We can then develop these templates with supporting procedures to align with your company requirements, reflecting the specific hazards that regularly effect your industry. Our consultants are constantly updated on the latest legislation, keeping you informed, your processes up-to-date and your business fully compliant.
